No-code AI-detection automation with DeepStack and Node-RED w.r.t cryo-EM Image Processing & MRI Scans [Medical Imaging] involving : Smart Devices + IoT + HPC Systems - An interesting suggestion for you.

Dr.Nirmal - ante Inst UTD Dallas TX USA - hmfg2014@gmail.com

[I] Main Idea :

as per our TITLE it is very clear -> Please keep trying & test Novel Algorithms -> Advanced Image Processing Algorithms.

[II] R&D Framework : *Please generate your own R&D Framework to Probe Image Processing + Informatics.*

For example : **https://www.vixra.org/pdf/2003.0304v1.pdf -> Very Advanced Algorithms for you.**

[III] Important Publications :

[a] *https://github.com/tejdnk-2019-ShortNotes &&*

[b] *https://medium.com/deepquestai/no-code-ai-automation-with-deepstack-and-node-red-c8ed40fbbe62*

[IV] Acknowledgment/s :

Non-Profit R&D.

[V] Conclusion/s with Future Perspectives :

A Pioneering R&D Effort.Certainly worth trying.

[THE END]
